

# TEXTILE FACE MASKS

## CONVENIENT PRICE DIRECTLY FROM THE PRODUCER

An important advantage of the fabric face mask is its durability and therefore the substantial costs saving related to the mask use in comparison to disposable face masks for single use.

You purchase directly from the producer at the best conditions without any additional costs for mediation of sales.

The price of our face masks mirrors efforts to ensure widespread availability of this product, so that it fits the best the requirements of private and public sector.

### REUSABLE

Face mask is made of fabric. It is washable at high temperatures (95°C) and can be disinfected by ironing the entire area. Quality material and processing ensure the long lifetime of each face mask.

### 2 LAYERS

Face masks are made of 2 layers of fabric. It ensures the optimal functional characteristics of each face mask.

### ERGONOMICS

Face masks have ergonomic shape for the best adhesion to face. Straps enable the optimal regulation of the size for each face; they provide the high comfort even when worn the whole day (the adhesion can be set, no press behind the ears as it is in case of rubber bands).

### 100% COTTON

Face masks are made of 100% cotton, which is kind to your skin and ensures the appropriate ratio of permeability and the filtration characteristics of the material.

### UNISEX & UNISIZE

Face masks have the shape which fits every face - female and male. Face masks can be adjusted for each size of head using the straps.

### ANTI-BACTERIAL

We produce the face masks from the material with anti-bacterial treatment for higher level of hygiene and freshness based on the molecules of titanium dioxide and silver chloride.

### CONVENIENT PRICE DIRECTLY FROM THE PRODUCER

An important advantage of the fabric face mask is its durability and therefore the substantial costs saving related to the mask use in comparison to disposable face masks for single use.

### MADE IN EU

By buying this product you support EU economy.
